

Tribhuvan University
Saraswati Multiple Campus
Lekhnath Marga, Thamel
MID TRM EXAM, 2026, 080 BATCH

Bachelors in Compute Applications Full M:60
Course: MIS and e-Business Pass M24
Code No: CACS301 Time:3 H
Semester : V

Candidates are required to answer the question in their own words as far as possible.

GROUP A

[1X10=10]

Attempt all

Questions MCQ[1X10=10]

- I. The dimension of e-commerce that enables commerce across national boundaries is called _____.
a. Interactivity ii. global reach iii. richness iv. ubiquity
- II. Prototype is a _____.
a. Working model of Existing System c. Mini Model of Existing System b. Mini model of Processed System d. None
- III. The largest component of a Web site budget is _____.
a. system maintenance b. system development c. content design and development d. telecommunications.
- IV. Which is not the Domain of Artificial Intelligence ?
a. Expert System hypermedia c. Both a and b d. None
- V. The primary source of financing during the early years of e-commerce was _____.
a. bank loans b. large retail firms c. venture capital funds d. initial public offerings
- VI. WAP is thetype of protocol.
a. Circuit b. Packet c. Message d. Both a&b
- VII. Supply chain management is the management of the _____.
a. A. Storage Raw Materials B. Flow of goods and services
b. Fulfillment of order D. Satisfaction of customer
- VIII. Which of the following is/are the types of SEO?
a. White Hat b. Black Hat c. Both A and B d. None of the above
- IX. Which is not the function of E-Commerce
a. Marketing b. Advertising c. Warehousing d. All
- X. Which cost are excluded from cost benefit analysis?
a. Relevant b. Opportunity c. Sunk d. Unimportant Cost

MID TRM EXAM, 2026, 080 BATCH

Bachelors in Compute Applications Full M:60
Course: MIS and e-Business Pass M24
Code No: CACS301 Time:3 H
Semester: V

GROUP B

Answer any six [6X5=30]

1. What is cryptocurrency with its legal provisions in Nepal? How it is different from virtual currency?
2. What is L-Commerce? Explain Limitations and Barriers of EC? [1+2+2]
3. What is SCM? Explain Supply Chain Management with proper example. [1+4]
4. What is digital signatures? Explain the Components of I-Way? [1+4]
5. Write Short Notes on. [2.5+2.5]
a. i) Denial of Service, ii) Heartbleed
b. Cryptography and its Types
6. Differentiate between SMART CARD AND CREDIT CARD [5]
7. In the digital world we live in now, information systems like TPS, MIS, and DSS are a must for any organization. Explain why this statement is true and explain how they help the organization [5]

Group C

Answer any Two[2X10=20]

9. How can you evaluate whether a e-commerce project is feasible or not? What can be different funding technique for the fresh graduate to setup new online business? [5+5]
10. What is SEO and Explain the cycle of SEO? Explain the use of Bots in SEO? [2+4+4]
11. What is Expert System? What are the components of Expert System? How is Expert System different from Transaction Processing System. [1+5+4]

Group 'A'

Attempt all the questions.

10x1=10

1. What we call the number of error bits that occur for a given number of bits transmitted?
a) bit error rate b) bit error c) error rate d) error bit rate
2. Which multiple access technique is used by IEEE 802.11 standard for wireless LAN
a) CDMA b) CSMA/CA c) ALOHA d) CSMA/CD
3. Which switching technique stores the entire message before forwarding?
a) Packet Switching b) Circuit Switching
c) Message Switching d) Virtual Switching
4. In which layer of OSI model do Repeater operate on?
a) Physical Layer b) Network Layer c) Data Link Layer d) Transport
5. LTE stands for
a) Long Term Evolution b) Long Transmission Entity
c) Low Transmission Efficiency d) Local Telephony Exchange
6. What type of cable is commonly used for 10Base-T Ethernet?
a) Coaxial Cable b) Fiber Optics Cable c) Twisted Pair Cable d) HDMI Cable
7. The physical layer of OSI Model deals with:
a) Data Formatting b) Electric signals and media
c) Logical Addressing d) Error detection and correction
8. How does fiber optic cable transmit data?
a) Electrical Signals b) Radio waves c) Photons d) Sound waves
9. VLAN stands for:
a) Virtual Local Area Network b) Variable Local Area Network
c) Virtual Logical Access Network d) Visual LAN
10. Which IEEE standard is used for Wireless LAN?
a) IEEE 802.3 b) IEEE 802.11 c) IEEE 802.5 d) IEEE 802.15

Candidates are required to give their answer in their own words as far as Practice

Group 'B'

Attempt any Six questions: (6*5=30)

- 1) Define transmission impairment. Explain the causes of impairments.
- 2) Define HDLC. Explain the HDLC frame formats.
- 3) Analyze the working principles of circuit switching, message switching, and packet switching. Compare their advantages, disadvantages, and suitability in modern communication systems with appropriate examples.
- 4) Explain various network topologies in detail
- 5) Explain symmetric key and public key cryptography with suitable examples and comparison
- 6) Explain how slotted Aloha improves the performance of system over pure Aloha.

Group 'C'

Attempt any Two questions: 2*10=20

- 7) Critically analyze the OSI reference model.
- 8) Evaluate the effectiveness of different unguided transmission media in modern data communication systems. Compare radio waves, microwaves, and infrared transmission in terms of bandwidth, coverage, interference, security, cost, and real-world applications, and justify which medium is most suitable for wireless communication environments.
- 9) Discuss error detection and correction scenario. Explain cyclic redundancy check (CRC) error detection technique with example.

P.D.N.S.

Bachelor of Computer Applications (BCA)
Course Title: Introduction to Management
Code No: C-AMG304
Semester: V

Full Marks: 60
Pass Marks: 24

Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

Group "B" Descriptive Questions. Attempt any SIX questions

[6x5=30]

2. What is management? Describe the functions of management.
3. What is planning? Discuss the process of planning.
4. What are the conditions of decision-making? Explain.
5. Discuss the major managerial roles in brief.
6. What are the main leadership styles?
7. Explain briefly about the contributions and limitations of Administrative Management theory.
8. Define Accountability. Distinguish between organizing and Staffing.

Group C Analytical Questions (Attempt any TWO questions)

[2x10=20]

9. Explain the contingency theory of management. What are its contribution and limitations?
10. "Organizing structuring is the process of designing jobs, grouping jobs and manageable units, and establishing patterns of authority among jobs and groups of jobs." In line with this statement, state the steps involved in the process of structuring and organization. Also, explain the principles of organizing.
11. Who is the leader? Explain briefly about the significance and most common styles of leadership.

Bachelor of Computer Applications (BCA)
Course Title: Introduction to Management
Code No: C-AMG304
Semester: V

Full Marks: 10

Group A

Q 1 Circle the best Answers.

- i. Top management is concerned with formulation of
a. Guidelines for supervisor b. long term plans
c. short term plans d. None of Above
- ii. Administrative management theory was developed by
a. Max Weber b. Henri Fayol c. Elton Mayo d. F.W. Taylor
- iii. Tools for planning are
a. Forecasting b. Networking
c. Linear programming d. All of the above
- iv. Selecting a best course of actions among alternatives is called as
a. Decision making b. Planning c. organizing d. Controlling
Responsibility always flows from
a. Superior to subordinate b. Subordinate to superior
c. Both a and b d. None of the above
- vi. According to Abraham Maslow, _____ is the highest level of need
a. Social need b. Esteem need c. Self-Actualization need d. Basic need
- vii. Which one doesn't belong to horizontal differentiation of organization structure?
a. Functional structure b. Tall Structure
c. Geographic Structure d. Matrix structure
- viii. Decentralization is the _____ of management
a. Techniques b. Philosophy c. Form d. Delegation
- ix. Generally, the duration of Tactical plan is _____
a. 1-3 years b. 2-3 years c. 3-5 Years d. 5-10 Years
- x. _____ is known as father of bureaucracy
a. Max Webber b. Mc Gregor c. Hertzberg d. FW Taylor

TRIBHUVAN UNIVERSITY
Faculty of Humanities & Social Science
SARASWATI MULTIPLE CAMPUS

Level: Bachelor-III year/V-Semester

Subject: Dot Net Technology (CACS302) (mid term)

FM: 60

PM: 24

Time: 3 hr.

A. Tick the correct answer

10X1=10

- I. Which component executes C# programs?
a. JVM b. CLR c. BIOS d. DOS
- II. Which feature helps prevent invalid memory access in C#?
a. Encapsulation b. Type Safety
c. Inheritance d. Polymorphism
- III. The process of converting IL code into machine code is called:
a. Interpretation b. Linking
c. JIT Compilation d. Parsing
- IV. Which memory management technique is used in .NET?
a. Manual Allocation b. Garbage Collection
c. Direct Addressing d. Paging Only
- V. Which of the following is an applied technology of .NET?
a. Xamarin b. Wordpress
c. Angularjs d. Bootstrap
- VI. Which framework component contains reusable classes?
a. CLR b. FCL c. CPU d. BIOS
- VII. Which namespace is commonly used for console input/output?
a. System.IO b. System
c. System.Net d. System.Text
- VIII. Which of the following keyword is contextual keyword in C#?
a. Object b. Value c. base d. Null
- IX. Which of the following is not pre-defined reference type in C#?
a. Object c. dynamic
b. String d. delegate
- X. Which of the following access modifier used to access member only within assembly?
a. internal c. private
b. public d. protected

B. Attempt any six questions 6X5=30

1. What do you mean by type safety? Explain with example.
2. What is CLR? List out important features of CLR?
3. What do you mean by value type and reference type? Give an example for each.
4. What do you mean by framework? Explain Dot Net Framework standard 2.0.
5. Write a C# program to make calculator using object-oriented concept.
6. Write a C# program to create simple class named person that contains basic information like name, age, citizen number and gender. Your class should also contain suitable methods for storing and displaying data?
7. What do you mean by method overloading and method overriding? Explain with suitable example?

C. Attempt any two questions 2X10=20

8. a) What do you mean by applied technology? Explain different applied technologies in details?
b) Write a program to find the factorial of given number 'n' using class and object concept?
9. Define constructor? Explain different types of constructors used in C# with example?
10. What is Jagged array? Explain with suitable example.

*****Best of Luck*****

Mid Term Examination 2083, 5th sem(080batch)

Candidates are required to answer the question in their own words as far as practicable.

Name: [Signature] Roll: [Signature]

Group A: (Multiple Choice Questions) (20 Minutes)

Choose the best option for the following:

1x10=10

- Which term refers to the storage of the pixel's brightness or color information in a computer graphics system?
A) Refresh Rate B) Frame Buffer C) Pixel Buffer D) Graphic Memory
- What happens after all commands in the display file are processed in a random scan system?
A) The system reboots B) The display file is erased C) The system cycles back to the first line command in the list D) The electron beam stops scanning
- Why is a random scan system also referred to as a vector display?
A) It uses vectors for image storage B) It draws pictures using vector graphics C) It employs vector processors D) It utilizes vector commands for display
- What transformation matrix is used for scaling about an arbitrary point in 2D graphics?
A) Translation matrix B) Rotation matrix C) Shearing matrix D) Homogeneous scaling matrix
- What is a fundamental component of a computer graphics image?
A) Vectors B) Pixels C) Lines D) Polygons
- What is the main purpose of a Display Processor in computer graphics?
A) To store pixel data B) To control the electron beam in a CRT C) To convert code into pictures D) To manage input devices
- Which of the following statements is true regarding both Raster Scan and Random Scan display systems?
A) They both store the image as a set of line drawing commands.
B) They both directly control the intensity of a pixel using a frame buffer.
C) They both require repeated refreshing of the screen due to the fading of phosphor.
D) They are both ideal for displaying complex, realistic images without flicker.
- What type of transformation alters the size of an object?
A) Translation B) Rotation C) Reflection D) Scaling
- What is the process of displaying graphics objects as a collection of pixels called?
A) Vectorization B) Rasterization C) Clipping D) Scan Conversion
- In the Midpoint Circle Algorithm, what is used to determine which pixel to choose next?
A) A decision parameter B) The slope of the tangent C) The radius of the circle D) The center coordinates

Mid Term Examination 2083, 5th sem(080batch)

Group B

Attempt all questions. [6*5=30]

- Explain different I/O devices. [5]
- Define different method of color generation in CRT monitor. [5]
- Plot the 1st octant of a circle centered at (-2,3), having radius 10 units. [5]
- Given a rectangular parallelopiped which is unit distance on z-axis, 2 distance on x-axis and 3 distance on y-axis. What is the effect of scaling when scaling and then translating if the scaling factors are $S_x = 1/2$, $S_y = 1/3$, $S_z = 1$ and translating factors are $t_x = 10$, $t_y = 5$, $t_z = 7$. [5]
- Show that successive scaling are multiplication. How do you represent translation, 2D rotation and scaling in homogeneous form [2 2]
- Compare RGB and CMYK color models. [1+4]

PKLO

Group C

Attempt all questions. [2*10=20]

- Write down the working of DDA algorithm. Plot a line from (4,9) to (8,5) using BSA algorithm. [5+5]
- Explain Sutherland Hodgeman Polygon Clipping algorithm and trace it to clip a line with end points P(10,30) Q(35,50) against a window whose lower left corner is at (15,25) and upper right corner is at (50,40). [4+6]
