

Lab-2:

1. Write a C# program to display the details of students using class and object.
2. Write a C# program to find area, volume and perimeter of rectangle box using class and object.
3. Write a C# program to make a calculator using object and method?
4. Write a C# program to find the factorial of a number 'n' using class and object?
5. Write a C# program to find the factorial of given number 'n' with argument with return value?
6. Write a C# program to demonstrate call by value and call by reference method.
7. Write a C# program to demonstrate different types of constructors.
8. Write a C# program to demonstrate destructor.
9. Write a C# program to demonstrate the use of properties for storing and displaying employee information.
10. Write a C# program to demonstrate automatic properties.
11. Write a C# program to demonstrate static class.
12. Write a C# program to demonstrate access modifier (private, public, internal).
13. Write a C# program to create base class name employee has a salary 40,000 and who is a programmer get bonus 10,000 pre month.
14. Write a C# program to demonstrate base keyword.
15. Write a C# program to demonstrate abstract class and abstract method.
16. Write a C# program to demonstrate abstract methods and abstract properties using a Bank Account system.
17. Write a C# program to implement an interface named IPayment that is used by EsewaPayment and KhaltiPayment classes.
18. Write a C# program to demonstrate method overloading using a Delivery Charge Management System.
19. Develop a C# application that sends different types of notifications such as Email, SMS, and Push notifications using method overriding.
20. Write a C# program to demonstrate upcasting and down casting.
21. Write a C# program to demonstrate different types of operator overloading.
22. Write a C# program to demonstrate sealed class and method.
23. Write a C# program to demonstrate Boxing and Unboxing.
24. Write a C# program to implement generic class and method.
